PROFILE

A curious business analytics professional passionate about creating a bridge between data scientists and stakeholders to create data driven solutions. Skilled at research, data modelling, machine learning, and visualizations.

EDUCATION

Master of Science in Data Science **GPA 4.00**
Bellevue University Bellevue, NE 2021
Coursework included: Applied Statistics, Data Exploration and Analysis, Data Preparation, Data Mining, Predictive Analytics, Data Presentation and Visualization, and Big Data

Bachelor of Science in Political Science and Sociology
Ball State University Muncie, IN 2000

CERTIFICATIONS

Data Scientist with Python - DataCamp
[Certificate](#) - December 2020
Python for Everybody - University of Michigan / Coursera
[Certificate](#) - July 2019
Customer Analytics - University of Pennsylvania / Coursera
[Certificate](#) - June 2019
IBM Data Science Professional - IBM / Coursera
[Certificate](#) - May 2019

DATA AND MODELING SKILLS

Data Exploration, Extraction, Wrangling
Machine Learning: Supervised, Unsupervised, Reinforcement, Clustering, Deep Learning
Statistical Analysis: Hypothesis and A/B Testing, Descriptive and Inferential Statistics

TECHNICAL SKILLS

Languages: Python, R, SQL
Data Analysis and Wrangling: Numpy, Pandas, Excel, dplyr, tidyR
Data Visualization: Matplotlib, Seaborn, Tableau, Plotly, Folium, ggplot2
ML Frameworks: Scikit-Learn, TensorFlow, PyTorch
Tools: GitHub, PyCharm, Jupyter Notebook, MS Office Suite
Big Data Technologies (limited): Hadoop, Spark, PySpark

BUSINESS SKILLS

Effective Communication and Deadline Management
Leadership and Stakeholder Management
Project Management and Oversight
Extensive Talent Acquisition Background
Creative and Perceptive Problem Solver
Passionate About Continuous Learning

DATA SCIENCE PROJECTS | [GitHub](#)

Breast Cancer Analysis and Prediction | [GitHub](#)

- Performed exploratory data analysis on the UCI Wisconsin Breast Cancer dataset to predict malignant and benign tumors in patients.
- Lasso Regression and OLS Regression were utilized to reduce the number of features from 30 to 11.
- A Random Forest Classifier model was selected based on consistent performance and accuracy (96%) for identifying cancerous tumors.

NBA MVP Predictor | [GitHub](#)

- With no criteria given to voters for selecting the MVP of the NBA, exploratory data analysis was performed on the previous 10 seasons, and the data cleaned to select important features. Correlations were evaluated to remove instances of multicollinearity.
- A Linear Regression model was built for selecting the MVP, with the correct MVP being selected 7 of 10 seasons. 10 of 10 seasons the model selected a player that finished in the top 3 of overall voting.

Consumer Ratings of Breakfast Cereal | [GitHub](#)

- Consumer cereal ratings were predicted based on various features.
- A Logistic Regression model was constructed and delivered precision, recall, and F1 scores exceeding .80 in every category.

EXPERIENCE

DMT Solutions Group Inc **Indianapolis, IN** **May 2012 – Dec 2020**
Director - Recruiting and Client Engagement

Principal of boutique firm providing talent acquisition and consulting services. Managed remote team of 6, delivering technical resources for numerous engagements.
